Merrick & Company and K.M Ng & Associates provided comprehensive planning, architecture, and engineering services for the design of a new Fitness Center at Laughlin AFB in Del Rio, Texas. The facility was designed in accordance with the USAF Fitness Facilities Design Guide developed by the Air Force Center for Environmental Excellence. This new facility provides one central location for aerobic and strength conditioning as well as a fully functional Health and Wellness Center (HAWC.)

The facility is comprised of four functional areas:

- Health and Wellness Center (HAWC)
- Aquatic
- Gymnasium
- Workout activities

Key features include:

- Wellness education and monitoring rooms
- Basketball courts with spectator seating
- Aerobics & cardiovascular workout rooms
- Racquetball courts
- Indoor running track
- Lap pool
- Locker room facilities
- Weight rooms

Project Features:

- Winner of the 2005 AETC Outstanding Design Award
- Landscape architecture
- MCACES cost estimate
- Interior design
- UFAS requirements
- ADA requirements
- Use of SPECSINTACT
- CAL raster files
- Proposed design team
