FOR IMMEDIATE RELEASE

Merrick Announces Two New Professional Engineers

Aurora, CO – July 9, 2009 – Merrick & Company announced two new professional engineers on its staff. The two individuals, Brian Philippi PE, civil design engineer, and Christina Wisleder PE, civil design engineer, both recently passed their professional engineer registration exams.

Philippi has been with Merrick for five years and is currently working on a water treatment plant and storage tank upgrade for the Town of Hot Sulphur Springs, Colorado, an American Recovery and Reinvestment Act funded project. He is also involved in a non-potable water interconnection for the Thompson School District, in Colorado. Philippi is a graduate of the Colorado School of Mines where he acquired a BS in engineering.

Wisleder, a Merrick employee since 2006, is involved in an arterial roadway widening of west Chatfield Avenue, from south Everett Way to south Wadsworth Boulevard and a 12,000 linear foot storm sewer project for the City of Denver. She holds a BS in civil engineering from Oklahoma State University and an MS in civil engineering from that same institution. Wisleder is a member of the Society of Women Engineers.

Merrick & Company, an \$85 million engineering, architecture, design-build, surveying, and geospatial solutions firm, serves domestic and international clients in the infrastructure, government, energy, life sciences, and mapping markets. The firm's work includes infrastructure design services for the Ridgeway Development, Lone Tree, Colorado as well as municipal engineering and district services for Arapahoe County Water and Wastewater Authority, Bear Creek Water and Sanitation District, and Bancroft Clover Water and Sanitation District.

The firm maintains an active Corporate Social Responsibility program serving the environmental, social, and economic aspects of the projects they're involved in and the communities they serve. Merrick is committed to sustainable design and construction practices through its 40+ LEED-accredited professionals and is continually expanding its in-house resources to serve tomorrow's needs. The firm maintains two offices in Colorado, one in Aurora and one in Colorado Springs as well as six other offices in the U.S., an office in Ontario, Canada, and two offices in Mexico.
