## FOR IMMEDIATE RELEASE

### Merrick Announces Design Contract with Jefferson County Division of Transportation and Engineering

Aurora, CO – August 17, 2011 – Merrick & Company was recently awarded a contract for design improvements to convert a one-mile portion of West Quincy Avenue, between South Simms Street and South Kipling Parkway, from an existing two-lane roadway to a four-lane roadway. The roadway is located adjacent to the D'Evelyn Junior Senior High School and Denver Water's Harriman Dam and Reservoir. The project will include close coordination with the Harriman Dam renovation project and with Xcel Energy, who maintains electric transmission lines through the corridor. Merrick anticipates completing final design in late 2011.

Other current civil infrastructure projects Merrick is involved in along the Front Range include West Chatfield Avenue (Wadsworth Boulevard to Everett Street), Arapahoe Road (Holly Street to Krameria Way) and the Alameda Avenue and Sable Boulevard Intersection.

Merrick & Company, a \$125 million employee-owned firm founded in 1955, provides comprehensive civil engineering and surveying services to private and public sector clients. Merrick focuses on civil infrastructure for public works, municipal, district, Federal, and private development clients, including services for street and roadway design, drainage engineering, water resources, wastewater systems, land development, and Federal base infrastructure. The company maintains 10 offices in the U.S. as well as offices in Canada and Mexico.

More information about Merrick & Company is located at the [Merrick & Company Newsroom](#).
