Program of Projects and Turnarounds

Engineering Tomorrow's Chemicals Today

At Merrick, we're dedicated to the efficient execution of process projects with particular expertise in:

Ammonia

Carbon black

Petrochemical

Nitric acid/urea

We specialize in development and implementation of industrial projects and provide consulting, engineering, and fully integrated Engineering-Procurement-Construction Management (EPCM) services to chemical manufacturing, allied products, and industrial facilities. We've designed, built, and operated industrial process and chemical production facilities since 1995.

EMPLOYEE OWNED
SINCE 1955

OSBL Integration of Three Process Plants

With aging facilities, growing demand for products, and new government mandates, the chemical industries are continuously challenged to execute cost-effective, accelerated projects. To meet these needs, Merrick develops designs that allow for equipment re-use, anticipate future needs, incorporate value engineering, and provide phased implementation and pre-turnaround construction to minimize downtime.

Merrick's clients also have access to The Merrick Consultancy, where subject matter experts can be employed on studies ranging from identifying business, technical and/or operational issues and challenges, facility audits to identify profit improvement opportunities to reliability assessments, and value chain optimization.

MERRICK®
& COMPANY

Specialists in Chemical Industrial Design

Merrick has your projects covered from conception through operations.

Project Development

- Strategic Planning
- Feasibility and Conceptual Studies
- Front End Loading (FEL) and Front End Engineering and Design (FEED)
- Process Modeling
- Preconstruction Planning and Estimating
- Value Engineering Survey

Project Engineering

- Full Disciplinary Detail Engineering
- Procurement Services
- 3-D Laser Scanning
- Hazop Facilitation
- Major Vendor Coordination
- Preconstruction Planning and Estimating

Project Construction

- Sub-Contract Administration
- EPCM Execution
- Construction Management
- Quality Assurance
- Materials Receipt/Warehousing
- Shop Inspections
- Expediting

Operation Support

- Loop Check, Commissioning and Startup
- Reliability Assessments and Recommendations
- Capital Budget Administration
- Turnaround Planning
- Onsite Staff
- Process Change Management
- Utility Optimization
