WE PUT SCIENCE FIRST

Truly understanding science is the first step toward designing spaces that advance it.

Merrick's scientists and technical specialists bring firsthand lab experience to every project. They've worked in the spaces they now design, giving them an insider's perspective on how labs should function—not just how they should be built.

Our science-first approach begins by transforming early-stage ideas into strategies tailored to your goals. Then, it continues through the creation of adaptable, future-ready spaces that keep pace with evolving demands.

Even when challenges arise in facilities designed by others, Merrick's commissioning experts step in to make systems work as intended. This same expertise also informs and enhances the projects we design, ensuring seamless functionality from the start.

CONSULTING

EXPERTISE ACROSS EVERY SECTOR OF LIFE SCIENCES

Meeting the demands of life sciences requires deep technical expertise and a full understanding of the challenges researchers, healthcare providers, and manufacturers face. Merrick brings a unique blend of consulting, design, and commissioning expertise to create spaces that support discovery, production, and care—tailored to the critical work happening inside.

DRIVING SUCCESS THROUGH PROJECT AND QUALITY MANAGEMENT

Merrick brings unmatched project management and quality assurance to every step of your facility's development. From managing schedules and budgets to overseeing contractors and ensuring compliance, we provide a seamless, stress-free experience for our clients.

COMPREHENSIVE OVERSIGHT

Merrick coordinates subcontractors, partners, and in-house teams seamlessly, delivering results without bottlenecks or surprises.

UNWAVERING QUALITY

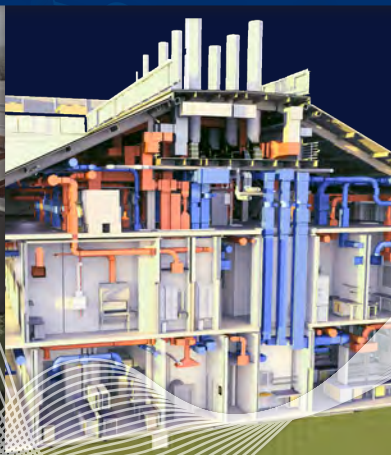

With a meticulous approach, we uphold the highest standards across design, commissioning, and construction phases, ensuring projects perform as intended.

LASER-FOCUSED EXPERTISE

Our team includes designers, commissioning agents, scientists, and experienced project managers who see the big picture while handling the finer details.
