

NUCLEAR DETERRENCE SUPPORT

MERRICK®

www.merrick.com

We Anticipate Your **Nuclear Design Needs**

Revitalizing our nuclear infrastructure and restoring production capabilities is of vital importance for our nation's security and defense. We're committed to supporting you as you restore and maintain our national nuclear deterrent. In the last three decades, we've supported nuclear missions at facilities across the US—from the Savannah River Site and the Los Alamos National Laboratory to Y12 and Pantex. This experience gives us the ability to anticipate the what-ifs associated with your specialized nuclear facility and equipment design needs, without compromising sensitive information. We also have a deep understanding of how to integrate specialized equipment designs within your facility infrastructure. As your total nuclear design partner, we're dedicated to advancing your critical defense mission. **Our experience includes:**

Nuclear & Non-Nuclear
Facility Design

Gloveboxes

Hot Cells

Special Nuclear Material
Process Equipment

Shielded Systems

Enclosed Systems

Facility & Equipment
Integration

Capital Line-Item Design
Project Leadership & Execution

Total Nuclear Facility **Design Solutions**

Whether you're creating specialized equipment; designing and integrating a new facility; or remodeling existing infrastructure, we provide total multidisciplinary nuclear facility and equipment design support, **including:**

Architecture

Civil Engineering

Construction
Support

Electrical
Instrumentation &
Controls

Fire Protection
Engineering

High Containment
Laboratory Design

Lidar & 3D
Modeling

Mechanical
Engineering

Project Planning &
Management

Structural
Engineering

DETAILED INSIGHT INTO YOUR NUCLEAR DESIGNS

Our digital twin experts can create accurate, comprehensive 3D models of your facility and/or equipment to help you make informed project decisions. These models can help mitigate risks and enhance safety by helping you plan for outages; reduce shutdowns; and spot and prevent potential problems.

SECURITY & COMPLIANCE IS A TOP PRIORITY

We have the specialized nuclear expertise necessary to optimize your facility's operations; keep your facility safe and secure; and meet required nuclear quality standards. Our team maintains top security clearances, and our certified Nuclear Quality Assurance (NQA-1) program provides for the successful implementation of various nuclear facility requirements. **Our team maintains:**

- Department of Energy Q Clearance
- Unclassified Controlled Nuclear Information (UCNI) certification
- Controlled Unclassified Information (CUI) certification
- Human Reliability Program (HRP) certification
