STRONGER INFRASTRUCTURE. STRONGER COMMUNITIES.

From flood-prone neighborhoods to utility-dense, ultra-urban corridors, stormwater infrastructure can define a community's future. Our designs can't just look good on paper—they need to be practical, reliable, and sustainable. That's why we take a constructability-first approach to stormwater engineering to get your projects built. We also conduct extensive stakeholder and public engagement to ensure our solutions also serve broader community needs. In addition, our flexible team brings integrated sub-discipline knowledge to keep your project staffed with the right expertise. By balancing flood protection with community priorities, we create holistic stormwater infrastructure solutions that protect your community and stand the test of time.

100-YEAR
IMPACT

5-YEAR
BUDGET

We designed a stormwater system in Denver built to withstand a 100-year flood event—all on the budget and schedule of a typical 5-year system—by designing smarter and planning for the future.

COMMUNITY-MINDED ENGINEERING, **BUILT TO LAST.**

We deliver solutions that safeguard neighborhoods, improve quality of life, and provide lasting performance for decades to come. **Our services include:**

*Stormwater
Collection &
Conveyance*

*Transportation
Drainage*

*Master
Planning*

*Water Quality
Treatment*

*Detention/
Retention
Facilities*

*Landscape
Architecture*

*Government
Affairs
& Funding
Support*

NATIONAL WESTERN CENTER

When planned open space was jeopardized by stormwater ponds in the National Western Center's new design, our team redesigned the stormwater system to preserve the park, relocate detention ponds, and deliver long-term community value—all while navigating complex, utility-dense site constraints.

WHERE LOCAL INSIGHTS SHAPE LASTING SOLUTIONS.

With local management and staff, we understand your community's priorities and can respond quickly to evolving needs.

FUNCTIONAL STORMWATER DESIGN + GREEN INFRASTRUCTURE = HOLISTIC SOLUTIONS FOR YOUR COMMUNITY

FROM FUNDING TO **FINISH LINE**

Finding the right funding sources can be the difference between a project moving forward or stalling out. That's where our government affairs & funding services (GAFS) experts come in: not just to help you navigate the process, but to partner with you in making your project a reality. We identify and match the most appropriate funding sources for your project; craft competitive applications; provide administration and compliance oversight; and keep your project on track to meet every milestone. We can even help secure additional funding when needed to strengthen your project's success.
