OUR TEAM

Merrick & Company's dedicated sustainability consulting team helps architects, engineers, construction managers, building owners and developers design, create and operate energy efficient, sustainable environments. Our sustainability team has expertise in working with all project types in both public and private sectors including Higher Education, Government, K-12, Healthcare, Corporate Office, Hospitality and Industrial. With a strong dedication to providing sustainability services, we have successfully consulted on **more than 300 LEED projects**, of which **nearly 150 are already certified**. Additionally, our portfolio includes **over 80 Green Globes projects**, hundreds of commissioning projects, and thousands of energy audits.

OUR FIRM

Merrick is an employee-owned, multidisciplinary professional services firm headquartered in Greenwood Village, Colorado. With a staff of approximately 500 employees across twenty offices, the company specializes in engineering and architectural design, custom equipment design-build, procurement, construction management, and geospatial services. Merrick has annual revenues greater than \$100M/year. In 2015, Merrick was chosen as the ENR Mountain States Colorado/Wyoming Design Firm of the Year.

Merrick provides professional services for its diverse client base that includes federal, state, municipal, university, and industrial and commercial customers, domestically and internationally.

Merrick's sustainability team is a single-source for providing all green building certification and energy efficiency technical and administrative services including:

- LEED/Green Globes Certification Consulting
- Federal Guiding Principles Compliance Certification Consulting
- Building Systems Commissioning
- Building Envelope Commissioning
- Retro-Commissioning
- Energy Modeling
- Energy Audits
- Performance Contracting Consulting
- Photovoltaic Design
