

# MERRICK®

## SITE STRATEGY STARTS HERE

[www.merrick.com](http://www.merrick.com) | [hello@merrick.com](mailto:hello@merrick.com)

A strong site plan does more than place buildings. It aligns disciplines, mitigates risk, and brings your vision to life. Our landscape architecture and land planning team looks beyond the surface to uncover both the potential and hidden challenges of your site. With a blend of technical insight and creative vision, we make complex sites manageable and good ideas buildable—guiding your project from early concept through groundbreaking with visually compelling tools and practical solutions that set the stage for your long-term success.

& Visualization

### Collaboration That Shapes Your Site

Our team-focused process allows us to seamlessly integrate with the site civil engineers, architects, and project stakeholders to align visions, uncover constraints, and create holistic solutions that drive faster, more efficient outcomes.

### Cross-Disciplinary Expertise

By bridging the technical constraints of civil engineering and spatial needs of architecture, we streamline coordination and deliver solutions that work in the field, not just on paper.

### We Bring Your Site to Life

Using the best technology available, we coordinate and quickly assemble all site-related design features, starting with the site grading surface, drainage features, utilities, hardscape, lighting, and planting. This working model gives a firm foundation on which to make design decisions rooted in real terrain and real constraints.

### Visualization That Supports Your Mission

Our in-house visualization studio works from the ground up to create a detailed site model that precisely reflects existing site conditions, proposed grading, and context. This model is updated at each project milestone to reflect the current design, providing a deeper understanding of your design and leading to more confident decision making through the life of your project.

## The Merrick Visualization Studio

The Merrick Visualization Studio provides world-class visualization services. Using expertise in 3D modeling, photography, videography, post-processing, and virtual reality, we bring your project vision to life. **We create compelling visual tools to:**

Clarify design  
intent

Support  
funding and  
stakeholder  
buy-in

Assist with  
internal and  
external  
marketing

Pinpoint site  
conflicts  
to identify  
solutions early
