

TRANSFORMING PUBLIC HEALTH LABORATORIES

www.merrick.com | hello@merrick.com

At Merrick, we specialize in enhancing the capabilities and efficiency of public health laboratories. Our uniquely comprehensive approach sets us apart from other firms, as we offer a full suite of Architecture, Engineering, Construction, Commissioning, and Science & Technology consulting services. Our team of experienced senior scientists and laboratory professionals, including credentialed biosafety and biosecurity experts, have hands-on experience in the very spaces we now help transform. We understand the challenges you face and are dedicated to supporting your daily operations and augmenting your existing capacity. We have a proven track record of collaborating with government, academic, and private research institutions across the U.S. and globally, addressing both animal and human health challenges.

You may know us for our large-scale projects, but we also excel in providing tailored services to meet your specific needs, many of which don't require extensive renovations. Let us help you find the right solutions to achieve your public health laboratory goals.

OUR GLOBAL REACH

30+
INTERNATIONAL CLIENTS & PARTNERSHIPS

55+
HIGH CONTAINMENT FACILITIES

38+
PUBLIC HEALTH LAB PROJECTS

OUR SERVICES
