Alaska Pipeline Asset Management

Client-Focused Upstream and Midstream Services

Merrick has designed upstream and midstream facilities for more than 30 years, providing engineering and capital project services for installation of network gathering, separation, treating, processing, and storage projects. We've designed new facilities, as well as modifications, expansions, and revamps to existing facilities across the range of upstream and midstream gas and liquids projects including:

- Well-head separation
- Gathering
- Treating
- Liquid and gas processing
- Storage
- Pipelines
- Loading/unloading infrastructure

Tank Farm Expansion; Forbes Terminal, CT

Merrick provides solutions from well to refinery that help our upstream and midstream clients execute the cost-effective, fast-paced projects that are critical to their success. Merrick develops projects that address current requirements, anticipate future facility needs, incorporate value engineering, and allow for equipment re-use. We focus on our client while providing engineering, procurement, and construction management services or fully integrated EPCM for the most cost-effective execution.

Our client focus helps you achieve your project goals across a broad range of services including staff augmentation, evaluation and integration of new technologies for enhanced production, regulatory compliance, or development and execution of high ROI fast-track projects.

High Definition Survey and Scan

Merrick has your projects covered from conception through operations.

Project Development

- Strategic Planning
- Feasibility and Conceptual Studies
- Front End Loading (FEL) and Front End Engineering and Design (FEED)
- Process Modeling
- Preconstruction Planning and Estimating
- Value Engineering Survey

Project Engineering

- Full Disciplinary Detail Engineering
- Procurement Services
- 3-D Laser Scanning
- Hazop Facilitation
- Major Vendor Coordination
- Preconstruction Planning and Estimating

Project Construction

- Sub-Contract Administration
- EPCM Execution
- Construction Management
- Quality Assurance
- Materials Receipt/Warehousing
- Shop Inspections
- Expediting

Operation Support

- Loop Check, Commissioning and Startup
- Reliability Assessments and Recommendations
- Capital Budget Administration
- Turnaround Planning
- Onsite Staff
- Process Change Management
- Utility Optimization
