

MERRICK®

UTILITY ENGINEERING

RELIABLE SYSTEMS, RESILIENT COMMUNITIES

www.merrick.com | hello@merrick.com

Reliable water and wastewater systems are the lifelines of a healthy community. Our utility engineering team works with you to plan, design, and rehabilitate your community's vital water, wastewater, and stormwater infrastructure. From sanitary interceptors and large water mains to force mains, utility rehabilitation, and master planning, we deliver solutions that are resilient, efficient, and built to serve for generations. With expertise in subsurface utility engineering and coordination, we also help you protect resources and reduce disruptions to keep your community running smoothly—both today and for years to come.

SERVICE AREAS

Sanitary Interceptors

Force Mains

Large Water Mains

Utility Rehabilitation

Subsurface Utility Engineering (SUE)

Utility Coordination

Master Planning

Merrick's qualified personnel include **over 150 infrastructure engineering professionals** ready to address your community's needs
